

Precision Ops Command™ - Complete Guide

Overview

Precision Ops Command™ is your digital command center for clinical trial execution. Six battle-tested tools that solve your most critical workflow gaps—from ICF version control to global enrollment tracking. No spreadsheets, no complexity. Just instant clarity and audit-ready compliance.

The 6 Mission-Critical Tools

1. TimeZone Harmony Planner - \$39

What it solves:

- Scheduling global meetings across multiple time zones
- Daylight savings confusion
- Finding overlapping business hours

Key features:

- Standalone, browser-based planner
- Visualize overlapping business hours
- Auto-adjust for daylight savings
- Generate shareable schedules with one click
- No plugins, no logins required

Who it's for:

- CRAs managing global sites

- Project managers coordinating international teams
- Anyone scheduling across 3+ time zones

Expected outcome:

- Save 2-3 hours per week on scheduling
 - Zero scheduling conflicts
 - Professional, shareable meeting invites
-

2. Smart Study Email Composer - \$49

What it solves:

- Time-consuming email drafting for routine communications
- Ensuring GCP alignment in all correspondence
- Maintaining audit trail logic

Key features:

- Instantly generate compliant, high-quality emails
- Common scenarios: visit scheduling, document requests, site communications
- Customizable templates
- Audit trail logic built-in
- Fast export features

Who it's for:

- Study managers
- CRAs
- Regulatory coordinators

Expected outcome:

- Save 5+ hours per week on email drafting
- 100% GCP-compliant communications
- Professional tone in all correspondence

3. Global Velocity Monitor - \$59

What it solves:

- Real-time enrollment tracking across multiple sites
- Identifying lagging regions
- DEI alignment monitoring

Key features:

- Multi-tiered enrollment tracking dashboard
- Captures planned vs actual randomization at site, country, and global levels
- Gauge DEI alignment
- Calculate pace ratios
- Color-coded status indicators
- Export data to CSV for reporting

Who it's for:

- Study managers
- Clinical operations directors
- Enrollment coordinators

Expected outcome:

- Real-time visibility into enrollment performance
 - Identify at-risk sites within minutes
 - Data-driven decision-making for site activation
-

4. Global Regulatory Submissions Tracker - \$59

What it solves:

- Tracking submissions across multiple countries and regulatory authorities
- Managing approval and expiry dates

- Handling overdue approvals and reapprovals

Key features:

- Track by study, country, and regulatory authority
- Monitor submission, approval, and expiry dates
- Flag overdue approvals
- Manage reapprovals after expiry
- Instant CSV exports
- Real-time submission oversight

Who it's for:

- Regulatory strategists
- Global study teams
- CRAs managing multinational trials

Expected outcome:

- Zero missed submission deadlines
 - Complete regulatory oversight
 - Audit-ready documentation
-

5. Audit Ready PDs (Protocol Deviations) - \$79

What it solves:

- Protocol deviation tracking and management
- Audit preparation
- Root cause analysis

Key features:

- Track and manage protocol deviations effortlessly
- Capture root causes, severity, status, CAPA, and outcomes
- Color-coded summaries

- Dynamic charts
- CSV export functionality
- Intuitive dashboard for site-level or multi-study oversight

Who it's for:

- Site-level staff (CRCs, Investigators)
- Study managers overseeing multiple studies
- Quality assurance teams

Expected outcome:

- Instant audit readiness
 - Clear deviation patterns and trends
 - Streamlined compliance management
-

6. Global ICF Version Tracker - \$89

What it solves:

- Managing informed consent versions globally
- Audit trail for ICF changes
- Version control across multiple sites

Key features:

- Manage informed consent versions globally
- Add new versions with protocol ID, consent type, version numbers, and effective dates
- Capture previous version details for audit trails
- Assign statuses (active, draft, archived)
- Add contextual notes
- CSV exports for seamless reporting

Who it's for:

- CRAs
- Project managers
- Regulatory leads managing multinational trials

Expected outcome:

- Complete ICF version control
 - Audit-ready documentation
 - Zero version confusion across sites
-

- Get suggested actions for underperformance
- Project final enrollment based on current pace

No signup required. Try it now!

Getting Started

1. **Choose your bundle** (or individual tools)
 2. **Instant access** - No implementation, no training
 3. **Start using immediately** - Browser-based, no downloads
 4. **Export your data** - CSV exports for reporting
 5. **Scale as needed** - Add tools or upgrade bundles anytime
-

Success Stories

Daniel S., Clinical Project Manager, Boston

“The Global ICF Tracker saved us during our last audit. Having version control and audit trails in one place gave our regulatory team instant confidence. Worth every penny.”

Anonymous CRA, Multi-site Oncology Trial

“The Global Velocity Monitor showed us which sites were lagging within minutes. We reallocated resources and got back on track. Saved the study timeline.”

FAQs

Q: Do these tools integrate with my existing systems? A: They’ re designed as standalone, browser-based tools that complement your existing workflows. Export data to CSV for integration with other systems.

Q: Is training required? A: No. If you can use email and spreadsheets, you can use our tools. Intuitive design means instant productivity.

Q: What about data security? A: All tools operate in your browser. No data is stored on our servers. You maintain complete control.

Q: Can I upgrade my bundle later? A: Yes. Upgrade anytime and pay only the difference.

Q: Is there a money-back guarantee? A: Yes. 14-day money-back guarantee on all purchases.
